Introduction

Welcome! I'm a healthcare professional turned UX Designer based in Chicago. I'm open to local opportunities, remote work and relocating to Toronto.

About Me

Essential Traits

- **Adaptable** - I love change and newness. I'm flexible and quick to adapt to new situations.
- **Curious** - I've been asking questions since I could talk and haven't stopped.
- **Collaborative** - As an extrovert, I love working and getting along with others.
- **Emotionally intelligent** - I am intuitive with others' emotions and pride myself in being able to respond calmly in stressful situations

Skills

Conducting user research
Analyzing data
Planning & conducting user testing
Writing user stories
Creating user flows
Wireframing
Prototyping
UX writing

Tools

Figma
HTML basics
CSS basics
JavaScript basics
Miro
Optimal Workshop
UsabilityHub

Project 1: Designing Recharge from Start to Finish

Recharge is a mental health app I designed from beginning to end (user research to high-fidelity prototype with multiple rounds of iterations). It is a mobile-first responsive web app made for CareerFoundry's UX Design course.

Click here for the Recharge case study on my portfolio.

Project 2: Project-based Learning through StudyBuddy

StudyBuddy is a vocabulary learning mobile app. I learned the ins and outs of the Design Thinking process through this project-based learning as a part of CareerFoundry's UX Design course.

Click here for the StudyBuddy case study on my portfolio.

Color Palette

I want to keep my portfolio color palette as white and minimal as possible due to two reasons 1) it reflects my style and 2) I want the content/case studies to be the focal point of the portfolio. That being said, I'd use these colors reservedly.

<u>Typography</u>
Roboto *Italics* **Bold** <u>Underlined</u> Thin **Medium Black**

Roboto is a common font with many typefaces, making it a great candidate for a website that will (hopefully) get lots of foot traffic from a variety of places and people. The many typefaces will allow me to convey my message clearly. Being such a simple and classic font, I can easily pair it with another more decorative font down the line if necessary.
